

CANYON

Soda Fountain

YELLOWSTONE NATIONAL PARK

- **THE GRAND CANYON OF THE YELLOWSTONE** is about 20 miles long, 800 to 1,200 feet deep, and 1,500 to 4,000 feet wide.
- **Hayden Valley** was named after Ferdinand V. Hayden who conducted surveys of Yellowstone in 1871, 1872, and 1878. The 1871 survey was the first official exploration of the Yellowstone area and the results were instrumental in the establishment of Yellowstone as the world's first National Park.
- **WATER AND HEAT** alter iron compounds in the rhyolite rock, causing the canyon walls to "rust" resulting in a variety of colors.
- **THE LOWER FALLS** of the Grand Canyon of the Yellowstone River fall 308 feet, making it one of the highest waterfalls in North America.
- **About 25,000 years ago**, most of Yellowstone National Park was covered under 4,000 feet of ice.
- **YELLOWSTONE NATIONAL PARK** is home to more than 60 species of mammals, the largest concentration of mammals in the lower 48 states.

DELAWARE NORTH COMPANIES PARKS & RESORTS AT YELLOWSTONE IS COMMITTED TO CONTINUAL ENVIRONMENTAL IMPROVEMENT. GREENPATH[®], OUR ENVIRONMENT MANAGEMENT SYSTEM, IS ESTABLISHED AND RECOGNIZED INTERNATIONALLY BY ISO 14001 STANDARDS. WE:
